Best Sellers Rank: #5,149 in Books (See Top 100 in Books) #13 in Books > Children's Books > Education & Reference > Math > Arithmetic

Customer Reviews

For over 35 years, School Zone has been an innovator in children's educational products. School Zone creates a wide range of educational resources to support every curriculum.

Wow, I'm impressed with the results. My grand son is going into Kindergarten this Fall and wants to learn his math but hard to keep him involved for long. With these he will go through the entire deck, almost like a game, before 'finishing his homework' and losing interest. Amazing results make it well worth it, cannot beat the price, and they are sturdy and will hold up for his use and that of his younger sister I am sure. Definitely recommend them.

I guess they work. My kid is learning to count. Sent them to school with her, haven't seen them since. Teacher didn't complain.

Great set! I ordered two of them. We work with counting pennies.

These are great for math practice for kids

I received these flash cards within two days of ordering them. My son is having a hard time doing math quick enough for the school system so we ordered these. We do 20 minutes a day of these and are happy with the results we are seeing. These cards are a little larger than normal playing cards and are color coordinated. I highly recommend these to any parent wanting to help their child in math.

Loved the quality of the cards; they were just what I was looking for. I have ended up taking 13 cards from the pack, that have the "easy" facts on both sides -- the $-0, -1$ or minus the whole number -- which leaves quite a few for him, 40, to use for practice.

As a Grandma, I decided it would be "fun" to use these flash cards as a "game" for the grandkids! It was a fun way to review or relearn addition for kids ages 5-8. When a grandchild gave the correct answer I'd give them a penny which they collected and then bought their favorite candy bar! It was amusing to watch their enjoyment without them even realizing we were practicing addition! I've also used the subtraction flash cards. So, start saving your pennies!!

as advertised
