Customer Reviews

This is great to use as a review for my A&P and 'Myology classes. I bought a few of them and use them to study and as a quick guide for what I learn in lectures.

These are so handy to have around. They help in class and in the office. I study them when I have a moment and learn something new at a glance. Then I work on remembering it until each day I learned something new. Knowledge is wonderful.

The cards are well laminated, clear text and images. It provides great reading material when you don't have a book. Diagrams seem very accurate as does labeling. Professional organisation to purchase from.

Used these sheets for med school and they are great and wipe clean so no worries about spilling coffee or anything on them and ruining your paper! They also are very informative! And easy to carry in your notebooks!

Great information included on this handout, but I wish I would remember to use it!

Great product, packaged great, just everything great. Will buy more, when I need it to further my education. Thank you so much Cindy Cumley

Purchased as a study aide for an upcoming class. Will be used as a quick study guide/referral to reinforce the textbook. This guide is nicely laminated, well-laid out, and easy to understand. All in all this serves the purpose I wanted it for.

I like these charts. They're great as quick references and for little study breaks in between class. Passive glances at it seem to work for me for some of it to stick with me for good.
