Flash Cards Of Common Freshwater Invertebrates Of North America Set One - Major Classes And Orders

Synopsis

Flash Cards of Common Freshwater Invertebrates of North America Set One - Major Classes and Orders consists of 32 cards, 30 of which feature a high-quality scientific illustration of an organism on one side and, on the other, the common and scientific names of the organism along with basic questions and answers about the biology, ecology, and environmental tolerances of the pictured organism. In addition, a booklet containing a glossary of terms, diagrams of body parts for the different taxa, an outline of the taxonomy of all taxa in the three sets, and suggestions for using the cards is also included. Set One covers the major classes and orders of freshwater invertebrates. This set would be basic to teaching/learning biology and ecology at the K-12 levels, for interpretation and outreach activity, and for biomonitoring of freshwater streams and ponds. The 4 inch wide by 6 inch high cards are printed in full color on synthetic material with uv-resistant ink.

Book Information

Cards: 32 pages

Publisher: McDonald and Woodward Publishing Company; Cards edition (December 9, 2009)

Language: English

ISBN-10: 0939923262

ISBN-13: 978-0939923267

Product Dimensions: 3.9 x 0.7 x 6.1 inches

Average Customer Review: 5.0 out of 5 stars 3 customer reviews

Best Sellers Rank: #1,756,476 in Books (See Top 100 in Books) #82 in [Books > Science & Math > Earth Sciences > Geology > Limnology](#) #180 in [Books > Science & Math > Biological Sciences > Zoology > Invertebrates](#) #2296 in [Books > Science & Math > Nature & Ecology > Natural Resources](#)

Customer Reviews

"They are an incredible asset in the field, they are large so even our preschool audience can use them easily. The markings are clear, and they are waterproof and sturdy, which is perfect since you are in a water setting. Love it!"- Katie Nainiger, Geauga Soil and Water Conservation District, Ohio

"The flash cards are an excellent resource for teaching about aquatic invertebrates in the field. They are simple to use and provide clear, easy to understand information. The images are perfect for basic identification!"- Lisa Bickell, Education Director, Montana Natural History Center

"We have used the cards numerous times for Envirothon training and classroom programs. They were used in

the classroom as well as in the field during presentations to grades 5-12. All teachers and resource people have commented on their usefulness. The pictures and details of the invertebrates are excellent and we have found that the majority of them are the exact ones we need for our various programs."- Ricky Hayes, Resource Conservationist, Wilson Soil & Water Conservation District, North Carolina

Dr. J. Reese Voshell, Jr. holds degrees from Randolph-Macon College (B.S., 1969) and Virginia Tech (Ph.D., Zoology, 1976), and has taught in the Department of Entomology at Virginia Tech since 1976. He has received numerous research grants to study the effects of pollution and environmental stress on freshwater invertebrates and has been named to the University's Academy of Teaching Excellence.

Perfect for my students who are visual learners.

nice product

Love this product for our environmental education box and plan on looking at the other two sets of flash cards.
