Customer Reviews

"Far and away the best (and most beautiful) maps of the islands available today." - Honolulu Advertiser

Used it for a month or so and liked it.

Perfect for our needs

We go to Kona every other year and I never, repeat never go there without the most updated version of this map. The detail is essential sometimes to find those hard to find, yet gloriously perfect attractions. It has been the difference between making a five minute hike from a little known, local trail; and a half-hour kahole-buster hike from the more notable access points.

This map will give you a picture of the island but doesn't really show the variation in topography with measurements as I was wanting. If you don't need a lot of detail, then this map is fine but if you want to know the rise of an area for hiking, get something else.

This map is fine if you need a wide-shot of the island, but if you want to really explore and want a

map with every conceivable attraction/waypoint marked, you should buy The Ready Mapbook of West Hawaii and The Ready Mapbook of East Hawaii (depending on where you plan to spend most of your time). These mapbooks were indispensable to us.

I bought this as a reference while looking for land on the big island, and for this purpose it is perfect. Its small enough that you unfold the whole map in your lap, while in the drivers seat of your car. This way you can see the whole island at once, yet it seems to have every town and subdivision clearly listed.

Very up to date Planning a trip, this will help you find restruants and other eateries Holels clubs and shopping areas Some places are low end and some are higher end. with everything in between

I spent two weeks on the Big Island taking helicopter flying lessons at the Kona airport. I kept this map in the rental car and referred to it daily, then gave it away at the end of the trip to the helicopter school for other students to use. Very useful and clear.
