The Thrills And Chills Of Amusement Parks (Science Of Fun Stuff)

Synopsis

Learn the science behind the fun of amusement parks in this fact-tastic nonfiction Level 3

Ready-to-Read, part of a series about the science of fun stuff! Did you know that a rollercoaster does not need an engine or power source of its own? And how exactly does a bumper car go without gas? Young science lovers will flip when they learn about the science behind amusement parks in this fun, fact-filled Level 3 Ready-to-Read! A special section at the back of the book includes Common Core-aligned vetted extras on subjects like geography and math, and there's even a fun quiz so readers can test themselves to see what they've learned!

Book Information

Series: Science of Fun Stuff

Paperback: 48 pages

Publisher: Simon Spotlight (February 17, 2015)

Language: English

ISBN-10: 1481428586

ISBN-13: 978-1481428583

Product Dimensions: 6 x 0.2 x 9 inches

Shipping Weight: 3 ounces (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars 9 customer reviews

Customer Reviews

Jordan D. Brown loves to write about science for kids, and is the author of *Micro Mania*, *Crazy Concoctions*, and *Robo World*. He's also the educational advisor for TV shows such as *Dinosaur Train* and *My Little Pony*. Jordan lives in Walker Valley, New York, with his wife Ellen, two children, and two dogs. Mark Borgions is an award-winning designer, illustrator, and animator. His illustrations have been published worldwide in advertising, editorial, and in children's books. He is also cocreator of a bestselling series of audio plays in his homeland of Belgium. As an

animator, he creates motion graphics and character animation for clients across the globe. He lives with his wife and two kids in Antwerp, Belgium.

My son really enjoy this product. I was hoping for more content but it is good for the price and length.

my 8 year old loved it.

Very cute. Just enough information to kick off a study unit. ãfÃ ã Åã ÆœÃ Å

Pretty easy to read, but the content is not dumbed down - covers basic principles of physics including Newton's laws.

My six-year-old (or 6.5, to be as precise as he likes to be), Dad, and Mom all LOVED this book! It was exciting for him to read about these things. He thought it was all very cool. But also - he's always been a bit scared of rides, in general, and it seemed to make him feel better/braver when he was able to get some understanding of why amusement park rides are scientifically 'safe'. As far as the level of the scientific explanations, he followed most of the explanations just fine, but Dad and Mom were around while he was reading out loud to enhance the explanations and make them easier to understand, as needed. We invented to real-life 'tests' for what was being explained, so it became pretty interactive. I bought several books from this series and we can't wait to read all of them!

I absolutely LOVE the Scince of Fun Stuff books! They really make learning fun. This is a gift for my nephew for Christmas, and he is going to love it! I was so happy to see that they have one on amusement parks. My nephew is a bit obsessed with amusement parks right now. I highly recommend any of the Fun Stuff books.

A good read for kids, but the age range of 6-8 seems a bit low. The words were not too difficult to pronounce, but the scientific explanations seemed to go over the head of my 7 year old.

This level three (advanced reader) ready-to-read book is filled with fun science information about the rides you'll find at an amusement park. What a great way of using a high interest situation to

teach a little science and reading too! I'd use this book anytime but if you are planning a trip to an amusement park this would be a great pre-reading assignment. Parents homeschooling their child and teachers....you'll want to check out this book! There's even a short history of amusement parks here! How cool! Book provided by publisher.
