Gene Machines (Enjoy Your Cells Series Book 4)

Synopsis

Welcome to your family all the wonderful inhabitants of Planet Earth. We share something very special with every human being, animal, plant, and microscopic creature. What do we share with all living things? We are all GENE MACHINES! Enjoy Your Cells is a series of children's books from the acclaimed creative partnership of scientist/author Fran Balkwill and illustrator Mic Rolph. Once again, they use their unique brand of simple but scientifically accurate commentary and exuberantly colorful graphics to take young readers on an entertaining exploration of the amazing, hidden world of cells, proteins, and DNA. It's over ten years since Fran and Mic invented a new way of getting science across to children. Think what extraordinary advances have been made in biology in that time and how often those discoveries made headlines. Stem cells, cloning, embryo transfer, emerging infections, vaccine development! Here in these books are the basic facts behind the public debates. With these books, children will learn to enjoy their cells and current affairs at the same time. And they're getting information that has been written and reviewed by working scientists, so it's completely correct and up-to-date. Readers aged 7 and up will appreciate the stories' lively language and with help, even younger children will enjoy and learn from the jokes and illustrations no expert required! Discover all the books in the ENJOY YOUR CELLS series, each available in coloring book and full-color formats!

Book Information

Series: Enjoy Your Cells (Book 4)

Paperback: 32 pages

Publisher: Cold Spring Harbor Laboratory Press; 1 edition (June 21, 2002)

Language: English

ISBN-10: 0879696117

ISBN-13: 978-0879696115

Product Dimensions: 7.8 x 0.2 x 8 inches

Shipping Weight: 4 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 5 customer reviews

Customer Reviews

Fran Balkwill is Professor of Cancer Biology at St. Bartholomew's Hospital and the London Queen Mary School of Medicine. Mic Rolph is a graphic designer with much television and publishing experience. Together, they have created many books for children, and have won several awards, including the prestigious COPUS Junior Science Book Prize.

My almost- 5 year old loves these whole series of books and has me read and re-read, and is talking with scientific vocabulary and asking questions that surprises other adults who I presume haven't seen these books. Great illustrations. Very happy I purchased, and I assume they will be in use for years to come!

My grandson loves the book. Very pleased with the purchase.

I bought this in combination with Have a Nice DNA to use as supplements for a middle school, General Science introduction to DNA and genes. They give a great overview, in an interesting format.

Frances Balkwill has the ability to write about science without making it seem to science-y or over kids heads. Mic Rolph's pictures are fun and draw kids in to the ideas. This book explains cells, proteins, DNA, as well as some current genetic hot topics. I use these with junior high students. They are always engaged in the topic!

A well-written book. Fun to read with kids.
