I just finished reading the month-by-month task list and it sounds perfect for the Pacific Northwest! I am going to get started today!

Awesome manual for the how to gardening in NW

The book is full of good to know information.

Great book if you live in the region.

Great book!

Just right for where I live and what I do, and to help my new gardener friends anticipate what their gardens need.

I am not much of a gardener, but I am a homeowner and I want my yard to look nice. I have looked online for suggestions of what to do each month for yard care, but they all seemed to be very general. I received this book today, March 2nd and was easily able to find what I should be doing this month for my area. This was exactly the kind of information I was looking for. The information was concise and even as a novice I didn't find it difficult to understand. I browsed through the future months and they all seemed well put together. There are plenty of pictures, but they don't overwhelm the reader, but instead help to enhance their knowledge. I am looking forward to working in my yard this month and feel a bit more prepared. I was fortunate enough to win this book in a Goodreads giveaway, but the opinion is all my own.

This is a good comprehensive book on yards, lawns, bushes etc. however I was hoping for fruits and vegetables to be included so I am disappointed. If I were looking for a landscaping book to maintain my plants, this is great...however "garden" to me equals veggies. This is a subjective review but it's not what I was hoping for.
