Teaching Writing: Balancing Process And Product (6th Edition) (Books By Gail Tompkins)

Synopsis

This best selling text by Gail Tompkins thoroughly examines genres and instructional procedures with a strong new focus on differentiating instruction to ensure success for all writing students. New chapters on the writer's craft and on writing across the curriculum offer detailed information on the six traits of good writing as well as writing in content areas, and new features provide insight into teaching English learners and using technology meaningfully in the writing classroom.

Customer Reviews

One of the primary strengths of the Tompkins text is that the full range of genres taught in K-8 settings is represented, giving novice teachers an idea of the many kinds of writing they can use to strengthen their students' content literacy. My beginning teachers love this text! Nikola Hobbel, Humboldt State University "There is much good, practical advice here for teachers" very accurate and on-target, lots of good assessment tools. If only my teachers had taught me poetry with this book! Mayra Daniel, Northern Illinois University "This is an excellent book. This edition is a significant improvement that has not lost any of the original efficacy. The balance, level headedness combined with 'just enough' research support are excellent. Guy Tranin, University of Nebraska, Lincoln "The examples are appropriate and lively" each example thoroughly explains the concept further for the reader. The rubrics and checklists for writing are great. Karla Broadus, University of Texas, San Antonio "The use of the classroom as a basis for examples is helpful and the figures used to illustrate bring the information together. All of the step by

step sections help to bring the content of the text into practice. Varied grade levels represented throughout help to make this text effective for teacher candidates who are contemplating teaching at different levels. Gail Brown, Randolph College

An expanded, reorganized edition of this excellent text for writing methods courses...one that advocates a process approach to writing, focusing on strategies that will help children in Grades K-8 use the writing process to develop and improve their writing skills while they improve their writing products. The text now begins with an introductory chapter that provides an overview of the five cyclical, recursive stages of the writing process-- prewriting, drafting, revising, editing, and sharing--along with practical instructional tips and techniques for each stage. Individual chapters then examine all major types of writing...through a practical, straightforward presentation which includes a wealth of children's actual writing samples that really help to bring the "writing process" to life. --This text refers to an alternate Paperback edition.

If I could only recommend one book for teachers to learn more about teaching writing, particularly elementary teachers, this would be the book I would beg teachers to read!

This book was required by one of my graduate classes. Apparently, I had just rented the book and after the class, the book disappeared from my on-line books. This book was so beneficial in helping me put together my Writer's Workshop, that I purchased a copy so that I could have it as a reference. Goes great with 6 + 1 Writing Traits.

I bought this for class and barely cracked it open

Easy to read format. Had to use this book for a Graduate Level Education class. Not too bad as far as Master's texts goes.

Most textbooks I do not keep, but this one I am because it is such a great resource.

Loved this book! A textbook worth keeping! Many practical uses and suggestions for teaching writing. I plan to keep this book easily accessible.

I rented this book through for my college teaching course! It actually arrived when it was suppose to

and it is full of great useful information. I wish I would have purchased this book instead of renting it!

its ok
