Vampire Bats, Giant Insects, And Other Mysterious Animals Of The Darkest Caves (Extreme Animals In Extreme Environments)

Synopsis

How does a blind fish find food? Can a giant centipede eat a bat for dinner? Caves are home to unique and bizarre creatures. Cave dwelling animals have found amazing ways to survive in complete darkness. Although the food supply is low and the environment can be toxic, many species thrive in the darkest caves. Author Ana María Rodríguez explores these remarkable creatures and how they survive in one of the most extreme environments on Earth.
