Aphids On The World's Crops: An Identification And Information Guide

Synopsis

A unique guide to the identification of the aphids which attack over 280 of the world's most significant crops. The aphids particular to a given host crop are listed, and a dichotomous key, illustrated with numerous small line diagrams, then leads to positive identification of a species. Systematically describes over 400 aphid species, and includes 150 halftones of mounted species.

Book Information

Hardcover: 474 pages

Publisher: Wiley; 1 edition (December 24, 1984)

Language: English

ISBN-10: 0471904260

ISBN-13: 978-0471904267

Product Dimensions: 6.1 x 1.2 x 9.3 inches

Shipping Weight: 1.8 pounds

Customer Reviews

..."this excellent book achieves its aim of making a rather difficult and very important group of insects accessible to the layman" --African Entomology, Vol 8/2, 2000 "For those who missed the original, don't hesitate now." --Entomologists Monthly Magazine, Vol 137, 2001 --This text refers to an alternate Hardcover edition.

Extensively revised and fully updated, *Aphids on the World's Crops* is the only publication to provide non-specialist workers wherever they are in the world with the means both to identify to species level, and to access the literature on, one of the main groups of agriculturally important insects. This new edition incorporates: The latest information on the biology and distribution of both major and minor aphid pest species covering 445 species in 130 genera. 40 additional crops, bringing the total to almost 300. More aphid species in the keys. Approximately 500 new references. An introductory section, featuring those aspects of the biology of aphids most relevant to their taxonomy and identification, is followed by a crop-oriented illustrated identification guide. The third

section comprises a comprehensive, systematic account of the genera and species of aphids inhabiting crop plants, including for each species its appearance in life, host plants, virus-transmitting ability, present geographical distribution and salient features of biology, with selected references. The book also includes a summary of the techniques available for studying aphids, a list of further information sources and a photographic guide to the 150 most economically important species. Written by leading authorities in this field, *Aphids on the World's Crops* is an essential reference tool for economic, applied and agricultural entomologists at universities, research institutes and advisory centres throughout the world. --This text refers to an alternate Hardcover edition.
