Customer Reviews

I chose this book for my husband, who grew up on a farm, and for our two grandsons, who love tractors. I thought this would be a good book for them to look at together, since my husband isn't much of a Dr. Seuss or Benjamin Bunny man! ;) I was right. They have had many a good conversation over this book and have really bonded with it. I am so happy I purchased it!

It was a perfect gift for our grandson (age 4) and since he is a huge fan of John Deere equipment he was thrilled by the awesome pictures! He couldn't wait to have someone read it to him...and grandpa couldn't wait to oblige him, haha!

Love love love. My boys love tractors and carry this book EVERYWHERE.

My 22 month old loves this book and it will grow with him. Lots of big pictures , you may not read much actual words but the kid loves to point out the different parts and types of wheels. He loves it

My 2 year old grandson absolutely loves this book. I don't actually read it to him, he just loves to look at the pictures and talk about the work being done in the photos. He has a great uncle that farms and teaches him about tractors, so he likes to call every driver "Farmer Andy". Great photos.

The images are fantastic, it's incredibly educational, too. This is intended as a gift for a bright 4 YO who LOVES tractors (especially John Deere) and everything you'd find on a working farm. The writing is just right--imparts information that that isn't overwhelming and it also doesn't talk down to the young reader. Great book for parent and child to read together. Glad I read it before I had to wrap it up to give--learned a lot!!

I bought this for my sons 4th birthday, he is crazy about John Deere tractors and loves this book and so does his 1.5 year old sister. The pictures are fantastic and the text is very kid friendly and not long winded. Definitely recommend.

My son loves it. He loves farming and knows when books are accurate or not so we are always looking for good farming books that are actually accurate on the pictures and details!
