Conceptis Puzzles is the leading number-logic and picture-logic puzzle supplier to magazine, newspaper, book, mobile, game console, and board game providers all over the world. Every day, over 10 million pages with Conceptis puzzles are printed in 40 countries worldwide.

Having worked through the Brown Belt and Black Belt (both series 1 and 2) I was looking for something just a bit more challenging. Saw this set and purchased this: Level Three. I find it just what I was looking for. I have completed the first 12 puzzles and see that they are increasing in difficulty. There are 124 puzzles and the spiral binding makes it easy to work on them one page at a time. BTW, I do use sheets from an earlier Kakuro book which show me all the number combinations possible for any given number.

Considering Level 2 is a hard puzzle book, this one is a step harder. I haven't tried Level 1 yet, but if the other books are any indication, it is hard also. I am extremely please with the difficulty of the puzzles and the quality of the paper. With this book, I have to erase a lot so the quality is really important. No I am no brainiac, but I do love a challenge, and these are definitely nasty. There are very few give-a-way combinations, so it's a thinking man's game the entire way through. There is a

huge amount of satisfaction when completing one of the puzzles. Also, the book lasts longer when the puzzles are harder! I also have the Level 4 book. Nasty, nasty, nasty! Fun stuff!

I am addicted to Kakuro and this series of four books is the ultimate challenge. I started with level 2 and am just about finished with the level 3 book. I find that all the puzzles are doable but some can take me up to 2 hours to solve. These puzzles are so good that I also bought volumes 1 and 4. I will do a book 1 puzzle for relaxation between the challenges of books 3 and 4. The quality of the books is excellent. The paper is durable and erases cleanly with a polymer eraser (no pencil erasers please). The spiral binding is first class. My nagging question is this....will there be more future books of this level, once I have completed these?.

I love Kakuro, especially the more challenging puzzles. Throughout the years, I've gotten a lot of different high-difficulty books, and I've enjoyed them because I could finish the puzzles, even if it took me days to do it! I don't know what it is about the puzzles in this particular book, but I can't complete them. I keep getting stuck--as I have with others before--but this time I can't get unstuck. No fun.

I have been doing Kakuro puzzles for 8 years and have been completing the puzzles in Black Belt Kakuro by Conceptis Puzzles for at least 6 years. I must have completed 8 or 10 of these books and was also able to complete the 2nd Degree Black Belt book---BUT I must say these puzzles are much harder. I am half way through Nasty Kakuro Level Three and have only completed about 10 of the puzzles. I am not sure if this is because of the computer program creating these puzzles or just my skill level. I will order Level Two next time. I do like the size of the book, the spiral form, and the nice grade of paper within the book.

These puzzles are a BIG step up from Black Belt 1 which I just completed. They are doable (2) but I decided to save this book and do the absolutely nasty level two in order to work my way up. I was having to fill in too many broad ranges of numbers and the page became a confusing mess.

I have been hooked on Kakuro puzzles for years and level 3 is the one that's just right for me! I also got level 4 and had to search too hard on the next move for most of them, especially since I work them while watching TV. Gave this book to my brother who had never worked Kakuro, and he probably should have started with an easier level. Didn't order level 1 or 2, but I am sure those are

good for beginners. Good quality paper that is easily erased and the binding is great also...other books literally fell apart at the seams. Best Kakuro book ever!!!! Will work it over and over.

These are truly nasty. I can do Nasty 1 and 2 over half without clues. Not nasty 3. For a challenge, this is your book.
