Customer Reviews

"Stunning photography accompanied by incisive narrative and informed oceanography make 'Ultimate Ocean-Pedia' the go-to juvenile marine reference book. An emphasis on the importance of oceanography to young people, plus its potential for life careers and positive protective actions are apparent throughout." -- Midwest Book Review "...marine biology takes pride of place with page after page of photogenic sea life from tiny krill on up to whales and polar bears. The author profiles a marine ecologist and interviews an oceanographer to cap chapters on modern research,

exploration, and industries, then closes with generous lists of sites to visit physically or virtually. A stimulating plunge for casual browsers and serious students alike." -- Kirkus Reviews.

CHRISTINA WILSDON grew up on Long Island in New York. She has written numerous kids books about animals and science, including the National Geographic Kids Reptileopedia. Christina lives with her family in the Pacific Northwest, where bald eagles nest in the city and orcas surface just offshore.

My 9-year-old picked it right up and dug in at a random page. Great for reading when we have a short wait instead of playing a video game.

My daughter thoroughly enjoys any of the books put out by National Geographic. They are fun and engaging to young readers while also teaching them things that they don't know. Highly recommend these books to others with children interested in the subjects that are presented within the books. This is a large book with high quality pictures. My daughter loves to go back and re-read.

I purchased this book for my 6 year old great-nephew. He loves the ocean and anything to do with it. He was so happy when he got it. My niece said he started reading it immediately and wouldn't put it down. He has even found a new favorite sea creature. I thought it was the perfect book for a young man searching for all the knowledge he could absorb about the ocean! Thanks for helping me become his favorite auntie!

Grandchildren seemed very pleased with this. Bringing it to the beach with them.
