Public Health Nursing: Population-Centered Health Care In The Community, 9e

Synopsis

Prepare for a successful career as a community/public health nurse! Public Health Nursing: Population-Centered Health Care in the Community, 9th Edition provides up-to-date information on issues that impact public health nursing, such as infectious diseases, natural and man-made disasters, and health care policies affecting individuals, families, and communities. Real-life scenarios show examples of health promotion and public health interventions. New to this edition is an emphasis on QSEN skills and an explanation of the influence of the Affordable Care Act on public health. Written by well-known nursing educators Marcia Stanhope and Jeanette Lancaster, this comprehensive, bestselling text is ideal for students in both BSN and Advanced Practice Nursing programs. Evidence-Based Practice and Cutting Edge boxes illustrate the use and application of the latest research findings in public/community health nursing. Healthy People 2020 boxes highlight goals and objectives for promoting the nation's health and wellness over the next decade. Levels of Prevention boxes identify specific nursing interventions at the primary, secondary, and tertiary levels. Practice Application scenarios help you apply chapter content to the practice setting by analyzing case situations and answering critical thinking questions. Linking Content to Practice boxes provide examples of the nurse's role in caring for individuals, families, and populations in community health settings. Unique! Separate chapters on healthy cities, the Minnesota Intervention Wheel, and nursing centers describe different approaches to community health initiatives. Community/Public Health Nursing Online consists of 14 modules that bring community health situations to life, each including a reading assignment, case scenarios with learning activities, an assessment quiz, and critical thinking questions. Sold separately.

Customer Reviews

This book helped me pass my class and I found the book relevant and worth purchasing. This is coming from a regular book renter.

Nursing School Textbook. It was a long read and could be boring at parts, but it got the job done. The book is very general, which may not be a help as at least my course had a lot of information that was tested that is specific to my area, but it had a LOT of information. I still read the chapters or at least the parts that were relevant to what we were lectured on. Got an A- in the class, so I can't complain!

A must have for clinical nurses. It'll be a go-to reference book for your MSN or on the job.

required text for BSN program. Great book with introduction to public health nursing. Delivered on time and condition as described. thank you.

Book needed for class at UNC CH Institute of Public Health.

Very quick customer support to below inquiry. Rent button was pressed by mistake, how do I cancel this?

Very helpful for my Community Health/Public Health nursing class. Easy to read and very informative. Highly recommend...

Great resource. Easy-to-use
