Making Classic Toys That Teach: Step-by-Step Instructions For Building Froebel's Iconic Developmental Toys

Synopsis

The Froebel Gifts are perhaps the world's first educational toys. Developed in the early 1800's by Friedrich Froebel, inventor of Kindergarten, the Gifts appear deceptively simple but represent a sophisticated approach to child development. Over the last 180 years these intricately conceived playthings have had a widespread impact, becoming interwoven with the history of art/design, popular culture, and education. Inspiring and informing the work of Maria Montessori, Rudolf Steiner, and others, Froebel's Gifts influenced Frank Lloyd Wright, Albert Einstein, Kandinsky, Klee, and more while Mattel used them in designing Tinker Toys, Color Cubes, and Unit Blocks. In *Making Classic Toys That Teach*, Doug Stowe, a professional woodworker and teacher, presents the history and valuable benefits of each gift while providing step-by-step instruction on how to build each toy and the box to hold them. Each of the 10 Froebel Gifts are featured: 1) balls of yarn, introducing color, shape and motion; 2) sphere, cylinder, and cubes on a hanging device; 3) divided cube building blocks; 4) rectangular blocks; 5) wooden cubes and triangular blocks; 6) geometric building blocks in various shapes; 7) colorful geometric shapes; 8) sticks and rings; 9) points – "small colorful objects, like beads" – that can be connected to create dotted lines, etc; 10) framework in the form of fiddlesticks or tinker toys. As the backlash towards our overly technological world increases, the philosophy of Froebel and an understanding of the value of his Gifts is part of the trend of more focused playtime and creative thinking for younger children that will help them make connections on their own regarding the world around them.

Book Information

Paperback: 144 pages

Publisher: Spring House Press (October 15, 2016)

Language: English

ISBN-10: 1940611334

Customer Reviews

Doug Stowe has been a self-employed woodworker since 1976. In addition to working in his wood shop, Stowe teaches children at the Clear Spring School a program called "The Wisdom of the Hands," a course dedicated to the concept that working with one's hands is essential to learning. The author of eight books, his most recent is "Beautiful Boxes, Design and Technique" published by Taunton Press in September 2014. He also writes for Fine Woodworking and other woodworking magazines. He currently lives with his wife Jean on a wooded hillside overlooking the beautiful historic community of Eureka Springs, Arkansas.

makes a great gift as an introductory guide to woodworking that, in turn, allows you to make great educational gifts for kiddos! really interesting background on Froebel's teaching methods and the history of these blocks used by the likes of Frank Lloyd Wright. Thoughtful instruction, including how to make basic jigs needed to get started. Great illustrations, while holding enough instruction back that you have to figure it out by doing. Great educational tool on so many levels!

Great book that will help create bonds between grown ups and kids!
