Customer Reviews

John Duncan Adams was a master carpenter and skilled craftsmen who wrote a number of books on the subject including Carpentry for Beginners, Metal Work and Etching, and Arts- Crafts Lamps-How to Make Them. --This text refers to the Hardcover edition.

This is the exact same book as "How to Make Mission Style Lamps and Shades" published by Dover Craft Books, also available from . Apparently the copyright's expired on this book, and anyone who wants to reproduce it is free to do that. This one's formatted a bit larger than the Dover edition, so the illustrations are larger, but it's the same book. Having said that, the designs are nice and there's lots of possibilities for making your own adaptations of them. The construction methods can be carried out in a simply equipped home shop.

What was there is very well done..... the book was short and some to the ideas were repeated.. wish the book would have been a little more off the beaten path with more ideas..... however i will refer

to this book when and if I decide to make a lamp.... The instructions are easy to follow

This book gives me some great ideas. Good book with some good plans.

I admit I'm a newbie to this but I was expecting more concerning the acquisition of materials and more content on the types of material other than measurements. .
