I am currently doing a personal study into the world of criminology and wanted a book that has insight into the mind of criminals. I seem to know more than this author does as far as I can tell. (Just from watching NCIS, Forensic Files, etc.) While I haven't finished the book, I was appalled that the author writes with horrible grammatical mistakes, missing punctuation, and other flaws. What kind of professional, if he is any sort of "professional" at all, writes like that? And what is up with the "free offer" in the book? No other worthwhile book I have read on kindle has anything like that. Overall: NOT WORTHWHILE!!!! Is there any way to put less than 1 star?

This is not a professional, research based book regarding the topics of criminal profiling nor criminal psychology. It impressed me as an ordinary and unimpressive opinion paper. The author didn't document any credentials or expertise he might have. There are multiple grammatical errors. He does not provide references for studies. There are even some questionable facts cited in my opinion. Basically I felt that I was reading some random, average guy's opinions. This is not a book for a serious student--just a rip-off by someone who had the bright idea to put his thoughts in writing and get the unsuspecting to give him money. For me, this is no more advanced nor insightful than mundane explanations of commonly shared opinions generally discussed over a beer or two. Maybe three. Thankfully it is very short in length with very large print so the disappointment ends quickly

I was looking to increase my knowledge about criminal psychology, given that psychology and criminal justice are my fields of study and expertise; I honestly thought this book would be more enlightening. It is an okay book for a high school student of average intelligence I guess, but it is really not of much help or interesting for someone who knows about the field of criminal justice and

psychology. I would just return it if I could. Grammar and spelling were obviously not of importance to the writer, let alone citing references from which information was gathered.

Criminal Psychology has always been one of my interest. I love watching crimes and investigation. It's interesting and intriguing at the same time. This book will provide you a better understanding on how a criminal think and what goes on through there minds. The author briefly discussed why they are the way that they are and what we can do to prevent the cycle. Discover what triggered them to arrive at the most horrifying event in their lives. This book is a great source of information. It's better to be aware and knowledgeable when it comes to this things.

Robert Forbes did a phenomenal job with this information about the criminal mind. He explores the who, what, why, and where of the actions of serial killers and mass murderers on a grand scale. If you are curious this particular book will answer any questions you have. Plus, it is a short read which makes it easy to read all the way through. I can't wait to read more from this author

I read the book for research. I needed to gain some insight into the mind of a serial killer. This book provided some information I already knew and some that was helpful. I look forward to reading more books by this author.

This was a great read, I've been intrigued by the criminal mind for sometime.I must admit that I couldn't put this book down! I found two chapters in particular very informative, Chapter 3 'Is discipline the issue' and chapter 4 'Get With The Program'. Chapter 3 discusses whether an upbringing has an influence in forming a criminal mind and chapter 4 highlights the very fact that an individuals state of mind has a major part to play.My favorite part of the book was Chapter 6 'Is the Gene pool to Blame' this made very interesting reading as the author discusses whether a criminal mind is hereditary.A great book and essential if you have an interest in criminal profiling or if you are simply intrigued by criminal psychology.

Not much to this book. It is short with big writing. I finally shed it in about 30 minutes and much of the information was repetitive
