Not very happy with my purchase, especially considering how much I spent on it. I've recently discovered it's missing pages, and quite a few from the looks of it, I believe one chapter is missing almost half the pages [no wonder I couldn't find figure 9.7!! Cause it's not there!!!!!!]. At least I have other people I can look onto since they have the proper amount of pages. What's funny is mine came shrink wrapped and everything so either A something sketchy is going on and products are being sold like new when they're used and they're being shrink wrapped or B the production line missed its morning coffee. Update: I have just discovered even more pages missing. I haven't been able to read a chapter without missing pages. Also, this book is written in. I'm extremely angry now considering I spent almost 70 dollars for this mess of a book. Update: Yeah, this Lab Manual is missing like half the actual manual. I'm pretty upset for the waste of money. I've been so busy with classes, studying, and work [not to mention, I actually had to go through the manual to see how much was actually missing], that I can't return it now, so looks like they took my money and ran off with it. Just another company ripping off the already broke college students. :|

Bought for my geology lab. Great explanations & examples.
