## Customer Reviews

I have already started studying it and I have also already practically used it. At the moment I can tell I like it very much and I hope it will show me new avenues in preparing claims. Please let me have few more days to present my final review. Thank you.

In the *“Construction Claims & Responses: Effective Writing & Presentation”* book, Andy Hewitt offers a particular methodology and systematic approach for construction claims preparation, management and response. A primary advantage of this book has been established by using realistic and useful examples of constructions claims to demonstrate, on a step-by-step, a methodology to successfully assembling and producing construction claims resulting in quick settlement. This book provides valuable guidance on how to save time using adjustable template and check lists in each step of the preparation process. In addition, the book addresses some effective presentation techniques rendering the reviewer’s job easy. The author stresses the necessity of using the CEES technique (Cause Effect Entitlement Substantiation) in a standardized way to demonstrate entitlement to compensation relying on project program analysis and accurate records. The book contains an in-depth strategy on how to use contract provisions, with a focus on the FIDIC contract, to supporting or defending construction claims. Surveys report that claims result in approximate 6% of avoidable costs in construction projects; this is why, such a book is a valuable guidance on how to save portion of these costs.

This is by far the best book in the subject. The book portrays the steps required to prepare or make determination on a claim. The book is portable, easy to read, full of examples and templates, and sensible advice of years of experience. It’s well priced, it’s worth it every penny. No one will go wrong with this book. BTW, this is a required textbook for the Distance Learning Construction Claims Class. Please enjoy.
