Customer Reviews

This product didn't come with the necessary access code like it said it would in the description. I now had to buy one offline, another \$50. Rediculous. Buy your product elsewhere.

You need an access code to be able to use the book complete waste of money without it

The book came super fast and I could not be any happier. It was perfectly bound and new. I recommend them to anyone looking to get books for a cheaper cost online and I will definately use you for every book that I need. Thanks

Item came just as expected. I would definitely recommend taking the chance of buying the workbook. There were no problems as far as tears, rips, or markings from previous owner. Just

excellent condition. I wonder if anyone used it at all... Thanks for the great find! :) who can beat the price, smh.

Usually I read reviews before I purchase, but this time I didn't. So sorry. Big book lots of info. But the illustrations are black and white and the diagram numbers and arrows etc. are the same. You can't hardly see them. I also bought the dvd. I haven't received it yet if it is no better then I will return both. But don't waste your money on the book.

as per usual, this product did not disappoint.....the workbook is comprehensive for the students I am working with and the feedback is great. I recommend this workbook for its ease and utility in the core subject of A&P.

I like this book and recommend it for people who are wanting to know a lot about Anatomy and Physiology. I love the dissecting mechanisms including the radiology view of the body and microscopic view. Animations are wonderful as well! It would be nice though if you write on the pages that the writing doesn't indent through a page and onto another page, including making the gaps a lot larger when filling out questions when watching the animations. Has a lot of information, get it if you are willing to learn!

This has been a horrible experience trying to do my homework with this used workbook. Most of the pages are already filled out so I have been using white out or covering the filled out pages with notecards, which is a huge waste of time. The workbook has mistakes made by the author, which should have been noticed in the editing process.
