Let's Review Chemistry: The Physical Setting

Synopsis

Barron's Let's Review Series titles are classroom textbook supplements that help prepare high school students who are studying for New York State Regents exams. This book reviews all high school-level chemistry topics and includes:

- A topic review covering atomic structure, chemical formulas and equations, the mathematics of chemistry, thermochemistry and thermodynamics, the phases of matter, chemical periodicity, chemical bonding, and much more
- Practice and review questions with answers
- Two recent New York State Regents exams with answers

Book Information

Customer Reviews

This edition contains very current material (including 2012 exam samples.) The format is concise, yet contains thorough explanations to guide students away from making errors when it comes to taking the state exam. This is a handy tool for the diligent student who may like to prepare on their own, as well as a useful tool for the student who needs to boost their over-all understanding of the course work.

This really helped me through chemistry class and SAT Chemistry. This was recommend by my tutor for SAT Chem. This is worth the purchase if you think like chemistry is a tough course for you.

I passed

Excellent for either reviewing high school chemistry, or for self learning. Book is full of worked examples, followed by problem sets to make sure the concepts and calculations have been mastered.

Great Book!

Ideal for HS class

This helped me pass chemistry. It got the job done.

very good for chem regents prep
